Features of the Arteon

Striking designs and genuine Volkswagen quality alloy wheels from the accessories range

Dreieich, June 2017. The new Arteon is positioning itself as bold and avant-garde with an extremely emotive outline. These attributes of the new Gran Turismo can be further accentuated with the expressively designed alloy wheels from Volkswagen Zubehör. However, as the Arteon is also a spacious yet extremely practical fastback, the accessory range also includes practical accessory solutions for transport in and on the vehicle, as well as for comfort and value retention.

19 inch Montevideo alloy wheels

load sill protection

There are four alloy wheel designs to choose from for the Arteon. The **20 inch "Rosario" alloy wheels** and **19 inch "Montevideo" alloy wheels** underline the bold dynamics of the new Arteon. The "Rosario" wheels, matt painted in Dark Graphite, simply draw attention to themselves with their turbine-shaped spoke design. With a burnished black finish, "Montevideo"

Volkswagen Zubehör

relies on an unusual spoke design, the unique feature of which is their aerodynamic design, which creates minimal air turbulence in the wheel housing.

The proven **"Sebring"** 18 inch alloy wheel in Galvano Grey Metallic, which has a 5-double spoke design, is also available for anyone who prefers to have a smaller wheel size on their Arteon. 17 inch **"Merano"** alloy wheels in Brilliant Silver are distinguished by their striking 10-spoke design and have been specially developed for use in winter conditions. All alloy wheels have been tested according to the strict specifications of the Volkswagen Group, guaranteeing a high degree of safety and functionality.

Naturally Arteon drivers can also obtain useful products included in the Volkswagen Accessories range to help retain the value of their vehicle, such as all-weather mats, mudflaps, luggage compartment solutions, load sill protection and much more to help them cope with the challenges of everyday driving. Volkswagen dealerships will be happy to provide information on the entire accessories range for the Arteon.
