NO. 95/2019

## Volkswagen also to cooperate with Siemens for Industrial Cloud

- **Siemens to ensure the efficient networking of production systems, machinery and equipment of various manufacturers at the 122 Volkswagen plants as integration partner**
- **Data transparency and analysis to lay the technological foundations for further productivity improvements at Volkswagen**
- **Volkswagen and Siemens intend to develop new functions and services together with machinery and equipment suppliers which can be used in future by all partners of the Industrial Cloud**

**Wolfsburg /Munich, March 29, 2019. The Siemens technology group is to be the integration partner for the Volkswagen Industrial Cloud. This was announced by Volkswagen and Siemens today. Siemens will play a key role in ensuring that machinery and equipment of different manufacturers at the 122 Volkswagen plants are networked efficiently in the cloud. The resulting data transparency and analysis will lay the technological foundations for further productivity improvements at Volkswagen plants. In addition, Siemens and machinery and equipment suppliers will make applications and apps from the MindSphere Internet of Things system available in the Volkswagen Industrial Cloud. Volkswagen and Siemens intend to develop new functions and services for the Industrial Cloud together with machinery and equipment suppliers; these will then be available to all future partners. The development of the Volkswagen Industrial Cloud is gathering pace.**

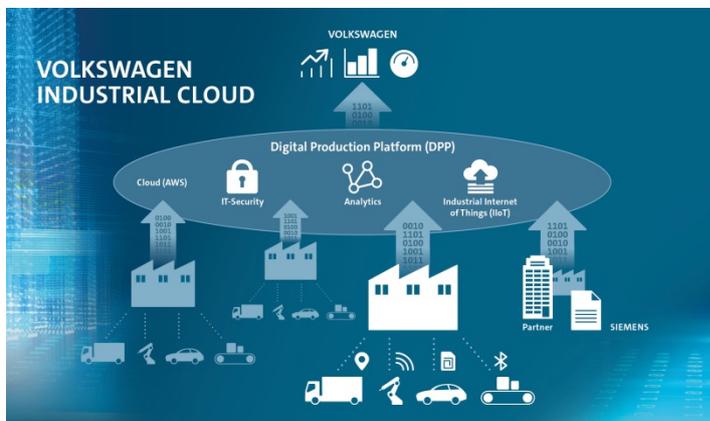

“We intend to make our Volkswagen Industrial Cloud a partner network with digital functions bringing benefits to all the participating companies. In Siemens, we have secured a strong partner with outstanding digitalization and industry expertise,” says Oliver Blume, Chairman of the Executive Board of Porsche AG and Member of the Board of Management of Volkswagen Aktiengesellschaft responsible for ‘Production’.

“We are pleased to support Volkswagen in the development of its new Industrial Cloud with our open IoT platform MindSphere. For this purpose, we will network machinery, production systems and equipment more effectively using MindSphere and our automation platforms. This way, Volkswagen, suppliers and machinery producers will be able to leverage the potential of produc-

tion data even more effectively. It will be possible to make production more efficient and flexible as well as further improving product quality,” says Klaus Helmrich, Member of the Managing Board of Siemens AG.

Siemens is contributing its comprehensive expertise in automation, the networking of machinery and plant and the world of industrial IoT to cooperation with Volkswagen. Apart from the applications and apps of the MindSphere platforms, this will also include industrial edge solutions. With this approach, production data will be processed directly by equipment and machinery or in the production process before they are transmitted to the Industrial Cloud. This will allow further optimization of complex production processes and also improve the data quality of the Volkswagen Industrial Cloud.

For example, Siemens and MindSphere partners also offer applications for the predictive maintenance of machines with optimized maintenance cycles calculated in advance. Via the cloud, these can then be rolled out to all the Volkswagen plants. It will be possible to control Volkswagen’s production environment and supply chain even more efficiently because the connected suppliers and machinery producers will also benefit from the knowledge gained from data analysis.

**Volkswagen and Amazon Web Services are developing the Volkswagen Industrial Cloud together. Siemens is joining the cooperation as an integration partner.**

With the Volkswagen Industrial Cloud, that is being developed jointly with Amazon Web Services (AWS), the Volkswagen Group is laying the foundation for the seamless digitalization of its production and logistics. In the long term, this will also include the integration of Volkswagen’s global supply chain with more than 30,000 locations of over 1,500 suppliers and partner companies. In future, the Industrial Cloud will also be available as a platform for other partners.

**About the Volkswagen Group:**

The Volkswagen Group, with its headquarters in Wolfsburg, is one of the world's leading automobile manufacturers and the largest carmaker in Europe. The Group comprises twelve brands from seven European

countries: Volkswagen Passenger Cars, Audi, SEAT, ŠKODA, Bentley, Bugatti, Lamborghini, Porsche, Ducati, Volkswagen Commercial Vehicles, Scania and MAN. The passenger car portfolio ranges from small cars all the way to luxury-class vehicles. Ducati offers motorcycles. In the light and heavy commercial vehicles sector, the products include ranges from pick-ups, buses and heavy trucks. Every weekday, 664,496 employees around the globe produce on average 44,567 vehicles, are involved in vehicle-related services or work in other areas of

business. The Volkswagen Group sells its vehicles in 153 countries.

In 2018, the total number of vehicles supplied to customers by the Group globally was 10,831 million (2017: 10,741 million). The passenger car global market share was 12.3 per cent. In Western Europe 22.0 per cent of all new passenger cars come from the Volkswagen Group. Group sales revenue in 2018 totalled €235.8 billion (2017: €231 billion). Earnings after tax in 2017 amounted to €17.1 billion (2017: €11.6 billion).

**Siemens AG** (Berlin and Munich) is a global technology powerhouse that has stood for engineering excellence, innovation, quality, reliability and internationality for more than 170 years. The company is active around the globe, focusing on the areas of electrification, automation and digitalization. One of the largest producers of energy-efficient, resource-saving technologies, Siemens is a leading supplier of efficient power generation and power transmission solutions and a pioneer in infrastructure solutions as well as automation, drive and software solutions for industry. With its publicly listed subsidiary Siemens Healthineers AG, the company is also a leading provider of medical imaging equipment – such as computed tomography and magnetic resonance imaging systems – and a leader in laboratory diagnostics as well as clinical IT. In fiscal 2018, which ended on September 30, 2018, Siemens generated revenue of €83.0 billion and net income of €6.1 billion. At the end of September 2018, the company had around 379,000 employees worldwide. Further information is available on the Internet at [www.siemens.com](http://www.siemens.com).
