Volkswagen, Mobileye and Champion Motors to Invest in Israel and Deploy First Autonomous EV Ride-Hailing Service

- **Volkswagen Group, Mobileye and Champion Motors have announced plans to commercialize Mobility-as-a-Service (MaaS) with self-driving vehicles in Israel.**
- **Volkswagen Group will provide the electric vehicles (EVs) as well as its in-depth knowledge about mobility services. Mobileye, an Intel Company, will provide a full turn-key hardware and software self-driving system. Champion Motors will be responsible for fleet logistics and infrastructure of the Mobility-as-a-Service deployment.**
- **The Israeli government supports the project proposal of the three partner companies**
- **Development will begin in early 2019 and roll out in phases reaching full commercialization in 2022.**

Tel Aviv, Israel, October 29, 2018 – The Volkswagen Group, Mobileye, an Intel Company, and Champion Motors announced plans to deploy Israel’s first self-driving ride hailing service – or Mobility-as-a-Service (MaaS) starting next year. For this, the partners are planning to establish a Joint Venture. The planned cooperation is subject to approval by the responsible authorities and bodies. Operating as “New Mobility in Israel,” the group’s proposal was formally accepted by the Israeli government during a private ceremony at the Smart Mobility Summit 2018 in Tel Aviv earlier today.

The Volkswagen Group will provide the electric vehicles (EVs) and bring in its in-depth knowledge and competency about design and deployment of user-centered mobility services. Mobileye will provide its level-4 AV Kit – a turn-key, driverless solution comprised of hardware, driving policy, safety software and map data. Champion Motors will run the fleet operations and control center. Together, the three companies will add the mobility platform and services, content and other Mobility-as-a-Service tools, ensuring a seamless rider experience in the deployment of a full-stack Mobility-as-a-Service offering.

The government of Israel has committed to support the project in three main areas: furnishing legal and regulatory support, sharing the required infrastructure and traffic data, and providing access to infrastructure as needed. While “New Mobility in Israel” will be Israel’s first commercial Mobility-as-a-Service with self-driving vehicles, all facilitations and rulings will be applied to all other ventures that wish to operate a Mobility-as-a-Service in Israel.

Volkswagen, Mobileye and Champion Motors will use “New Mobility in Israel” to serve as a global beta site for testing and introducing the Mobility-as-a-Service model using autonomous electric vehicles. The project will start in early 2019 and scale to commercialization by 2022.

“New Mobility in Israel” will roll out in phases and grow quickly from several dozen to hundreds of self-driving electric vehicles.

This initiative harnesses the disruptive power of several trends in the automotive industry: autonomous vehicle platforms changing the way we control vehicles, electric vehicles changing how we power vehicles, and Mobility-as-a-Service changing how we access mobility.

“We firmly believe that self-driving electric vehicles will offer Israel and cities around the world safe, clean and emission-free mobility, which is accessible and convenient. We are looking forward to this partnership with our local partners Mobileye and Champion Motors from Israel,” said Dr. Herbert Diess, CEO of the Volkswagen Group.

“We are delighted to embark on a joint venture with a world-leading automotive OEM, aimed at delivering a transformational mobility service,” said Professor Amnon Shashua, Mobileye CEO and senior vice president at Intel. “Our service aims to intelligently and dynamically adapt to the urban mobility needs of the 21st Century, catering to the mobility-mileage demands within the city while minimizing the direct/indirect incurred societal costs – air/noise pollution, congestion and safety.”

About the Volkswagen Group:

The Volkswagen Group, with its headquarters in Wolfsburg, is one of the world's leading automobile manufacturers and the largest carmaker in Europe. The Group comprises twelve brands from seven European countries: Volkswagen Passenger Cars, Audi, SEAT, ŠKODA, Bentley, Bugatti, Lamborghini, Porsche, Ducati, Volkswagen Commercial Vehicles, Scania and MAN. The passenger car portfolio ranges from small cars all the way to luxury-class vehicles. Ducati offers motorcycles. In the light and heavy commercial vehicles sector, the products include ranges from pick-ups, buses and heavy trucks. Every weekday, 642,292 employees around the globe produce on average 44,170 vehicles, are involved in vehicle-related services or work in other areas of business. The Volkswagen Group sells its vehicles in 153 countries.

In 2017, the total number of vehicles supplied to customers by the Group globally was 10,741 million (2016: 10,297 million). The passenger car global market share was 12.1 per cent. In Western Europe 22.0 per cent of all new passenger cars come from the Volkswagen Group. Group sales revenue in 2017 totalled €231 billion (2016: €217 billion). Earnings after tax in 2017 amounted to €11.6 billion (2016: €5.4 billion).

About Mobileye, an Intel Company

Mobileye, an Intel Company, is the global leader in the development of computer vision and machine learning, data analysis, localization and mapping for advanced driver assistance systems and autonomous driving. Our technology keeps passengers safer on the roads, reduces the risks of traffic accidents, saves lives and has the potential to revolutionize the driving experience by enabling autonomous driving. Our proprietary software algorithms and EyeQ® chips perform detailed interpretations of the visual field in order to anticipate possible collisions with other vehicles, pedestrians, cyclists, animals, debris and other obstacles. Mobileye's products are also able to detect roadway markings such as lanes, road boundaries, barriers and similar items; identify and read traffic signs, directional signs and traffic lights; create a RoadBook™ of localized drivable paths and visual landmarks using REM™; and provide mapping for autonomous driving. Our products are or will be integrated into car models from more than 25 global automakers. Our products are also available in the aftermarket.

About Champion Motors

Champion Motors, a fully owned company by Allied Group, has been successfully representing the Volkswagen Group in Israel since 1965 as the direct importer and distributor of Volkswagen, Audi, ŠKODA, SEAT and Volkswagen commercial vehicles. Champion Motors holds a key position in the Israeli market as the second-largest car importer and distributor with an active role in the automotive and smart mobility ecosystem. It provides both funding to start-ups as well as business opportunities through joint ventures with the VW Group such as ŠKODA AUTO DigiLab Israel, XPLORE by SEAT and now New Mobility in Israel.
